The recent movement in K-12 education toward common standards in key subjects represents an unprecedented opportunity for improving learning outcomes for all students. These standards initiatives - the Common Core State Standards for English Language Arts and Mathematics (CCSS) and the Next Generation Science Standards (NGSS) - are informed by research on learning and teaching and a decade of standards-based education reform. While the standards have been developed separately in English/Language Arts and Science, there are areas where the standards intersect directly. One such area of intersection occurs between the "Literacy in Science" portions of the Common Core State Standards for English/Language Arts and the practices in the NGSS (originally outlined in the NRC's A Framework for K-12 Science Education), particularly the practice of "Obtaining, evaluating and communicating information".

Because the CCSS literacy in science standards predated the NGSS, developers of the NGSS worked directly with the CCSS team to identify the connections between the two sets of standards. However, questions about how the two sets of standards can complement each other and can be used in concert to improve students' reading and writing, as well as listening and speaking, in science to learn science continue to exist.

Literacy for Science is the summary of a workshop convened by the National Research Council Board on Science Education in December 2013 to address the need to coordinate the literacy for science aspect of CCSS and the practices in NGSS. The workshop featured presentations about the complementary roles of English/language arts teachers and science teachers as well as the unique challenges and approaches for different grade levels. *Literacy for Science* articulates the knowledge and skills teachers need to support students in developing competence in reading and communicating in science. This report considers design options for curricula and courses that provide aligned support for students to develop competencies in reading and communicating, and addresses the role of district and school administrators in guiding implementation of science and ELA to help ensure alignment. *Literacy for Science* will be a useful point of reference for anyone interested in the opportunities and challenges of overlapping science and literacy standards to improve the learning experience.

From reader reviews:

John Dudley:

Do you considered one of people who can't read gratifying if the sentence chained inside the straightway, hold on guys this specific aren't like that. This Literacy for Science: Exploring the Intersection of the Next Generation Science Standards and Common Core for ELA Standards: A Workshop Summary book is readable by simply you who hate the straight word style. You will find the data here are arrange for enjoyable reading through experience without leaving even decrease the knowledge that want to offer to you. The writer of Literacy for Science: Exploring the Intersection of the Next Generation Science Standards and Common Core for ELA Standards: A Workshop Summary content conveys thinking easily to understand by most people. The printed and e-book are not different in the information but it just different such as it. So , do you still thinking Literacy for Science: Exploring the Intersection of the Next Generation Science Standards and Common Core for ELA Standards: A Workshop Summary is not loveable to be your top collection reading book?

Norris Patterson:

Playing with family within a park, coming to see the water world or hanging out with pals is thing that usually you may have done when you have spare time, after that why you don't try matter that really opposite from that. A single activity that make you not sense tired but still relaxing, trilling like on roller coaster you have been ride on and with addition info. Even you love Literacy for Science: Exploring the Intersection of the Next Generation Science Standards and Common Core for ELA Standards: A Workshop Summary, you may enjoy both. It is very good combination right, you still need to miss it? What kind of hang-out type is it? Oh can occur its mind hangout folks. What? Still don't understand it, oh come on its identified as reading friends.

Micheal McDonough:

Reading a book to be new life style in this calendar year; every people loves to read a book. When you learn a book you can get a large amount of benefit. When you read books, you can improve your knowledge, due to the fact book has a lot of information onto it. The information that you will get depend on what forms of book that you have read. If you need to get information about your review, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, this sort of us novel, comics, along with soon. The Literacy for Science: Exploring the Intersection of the Next Generation Science Standards and Common Core for ELA Standards: A Workshop Summary provide you with new experience in examining a book.

Jay Klein:

What is your hobby? Have you heard that question when you got learners? We believe that that query was given by teacher for their students. Many kinds of hobby, Everybody has different hobby. And you also know that little person similar to reading or as looking at become their hobby. You need to understand that reading is very important and also book as to be the matter. Book is important thing to include you knowledge, except your personal teacher or lecturer. You see good news or update about something by book. Many kinds of books that can you take to be your object. One of them is actually Literacy for Science: Exploring the Intersection of the Next Generation Science Standards and Common Core for ELA Standards: A Workshop Summary.
