Development of Packaging and Products for Use in Microwave Ovens (Woodhead Publishing in Materials)

The efficient design of microwave food products and associated packaging materials for optimum food quality and safety requires knowledge of product dielectric properties and associated heating mechanisms, careful consideration of product geometry, knowledge of modern packaging and ingredient technologies, and application of computer simulation, statistics and experimental design. Integrated knowledge and efficient application of these tools is essential for those developing food products in this demanding field.

Development of packaging and products for use in microwave ovens provides a focused and comprehensive review for developers. Part one discusses the principles of microwave heating and ovens, with an emphasis on the effect of food dielectric properties and geometry on heating uniformity and optimising the flavours and colours of microwave foods. Microwave packaging materials and design are discussed in Part two; chapters cover rigid packaging, susceptors and shielding. Product development, food, packaging and oven safety is the topic of Part three. Computer modelling of microwave products and active packaging is discussed in Part four.

Written by a distinguished team of international contributors, Development of packaging and products for use in microwave ovens is a valuable resource for those in the food and packaging industries.

- Comprehensively reviews the principles of microwave heating and ovens assessing the effect of food dielectric properties on heating uniformity
- Thoroughly reviews microwave packaging materials and design including testing and regulatory issues
- Features a seven page section of colour diagrams to show heat distributions

From reader reviews:

Leta Welter:

What do you in relation to book? It is not important to you? Or just adding material when you require something to explain what your own problem? How about your spare time? Or are you busy individual? If you don't have spare time to do others business, it is make one feel bored faster. And you have spare time? What did you do? Every individual has many questions above. They need to answer that question because just their can do that will. It said that about reserve. Book is familiar in each person. Yes, it is correct. Because start from on guardería until university need that Development of Packaging and Products for Use in Microwave Ovens (Woodhead Publishing in Materials) to read.

David Gaytan:

The particular book Development of Packaging and Products for Use in Microwave Ovens (Woodhead Publishing in Materials) has a lot of information on it. So when you check out this book you can get a lot of benefit. The book was compiled by the very famous author. The author makes some research just before write this book. This specific book very easy to read you can find the point easily after reading this book.

Nancy Page:

You can spend your free time to see this book this guide. This Development of Packaging and Products for Use in Microwave Ovens (Woodhead Publishing in Materials) is simple to bring you can read it in the playground, in the beach, train in addition to soon. If you did not possess much space to bring the particular printed book, you can buy the e-book. It is make you better to read it. You can save often the book in your smart phone. Therefore there are a lot of benefits that you will get when you buy this book.

Linda Doyle:

As we know that book is vital thing to add our expertise for everything. By a e-book we can know everything we want. A book is a pair of written, printed, illustrated or maybe blank sheet. Every year had been exactly added. This book Development of Packaging and Products for Use in Microwave Ovens (Woodhead Publishing in Materials) was filled about science. Spend your spare time to add your knowledge about your technology competence. Some people has distinct feel when they reading a new book. If you know how big advantage of a book, you can experience enjoy to read a reserve. In the modern era like at this point, many ways to get book you wanted.
