Biogas Production from Anaerobic Digestion of Food Waste: Food Waste Management Ali Akhter Attari, Muhammad Mehtab Attari, Muhammad Tanveer Ahmed Ranjah

Waste management problem has raised a huge attention from many authorities. Besides that, non-renewable energy depletion caused awareness to the society on curbing the issue. Due to these current issues, biogas production from solid waste was introduced. In this work the method to produce the biogas was anaerobic digestion. It is a digestion process of organic wastes without the presence of oxygen. A lab scale anaerobic digester for batch mode was built. Methane production from solid waste specifically food waste (green waste, kitchen waste etc.) was done. The digestion process was done by the aid of inoculum which was cow dung as the amount of micro-organisms is high. A 350 liters plastic container of height 90 cm and diameter 70 cm was used as a bio-digester and biogas was collected in tyre tubes. Methane tank was filled up to 70% of volume by organic wastes. Methane production was monitored daily and in detail on weekly basis. It was found that using a mixture of cow dung and food waste retention period was 21 days. Gas started to produce on 7th day. Amount of biogas obtained was 136 dm³. This biogas digester may be used domestically as well as for the demonstrative purposes.

From reader reviews:

Elizabeth Parker:

Playing with family in the park, coming to see the ocean world or hanging out with friends is thing that usually you could have done when you have spare time, and then why you don't try issue that really opposite from that. One particular activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you already been ride on and with addition associated with. Even you love Biogas Production from Anaerobic Digestion of Food Waste: Food Waste Management, you could enjoy both. It is excellent combination right, you still desire to miss it? What kind of hangout type is it? Oh occur its mind hangout guys. What? Still don't understand it, oh come on its identified as reading friends.

Pedro Engle:

This Biogas Production from Anaerobic Digestion of Food Waste: Food Waste Management is great book for you because the content which can be full of information for you who always deal with world and also have to make decision every minute. This kind of book reveal it info accurately using great plan word or we can state no rambling sentences within it. So if you are read it hurriedly you can have whole details in it. Doesn't mean it only gives you straight forward sentences but tough core information with beautiful delivering sentences. Having Biogas Production from Anaerobic Digestion of Food Waste: Food Waste Management in your hand like obtaining the world in your arm, information in it is not ridiculous one. We can say that no reserve that offer you world inside ten or fifteen moment right but this reserve already do that. So , this is certainly good reading book. Hello Mr. and Mrs. hectic do you still doubt this?

Edward McCain:

This Biogas Production from Anaerobic Digestion of Food Waste: Food Waste Management is new way for you who has interest to look for some information given it relief your hunger associated with. Getting deeper you upon it getting knowledge more you know or perhaps you who still having bit of digest in reading this Biogas Production from Anaerobic Digestion of Food Waste: Food Waste Management can be the light food for you personally because the information inside this particular book is easy to get through anyone. These books build itself in the form which is reachable by anyone, sure I mean in the e-book form. People who think that in reserve form make them feel sleepy even dizzy this e-book is the answer. So there is not any in reading a book especially this one. You can find actually looking for. It should be here for you actually. So , don't miss this! Just read this e-book sort for your better life and knowledge.

Donna Salerno:

Reading a publication make you to get more knowledge from the jawhorse. You can take knowledge and information coming from a book. Book is prepared or printed or created from each source in which filled update of news. In this particular modern era like at this point, many ways to get information are available

for a person. From media social similar to newspaper, magazines, science e-book, encyclopedia, reference book, new and comic. You can add your understanding by that book. Are you ready to spend your spare time to open your book? Or just in search of the Biogas Production from Anaerobic Digestion of Food Waste: Food Waste Management when you needed it?
