Emergent Technologies and Design: Towards a Biological Paradigm for Architecture Michael Hensel, Achim Menges, Michael Weinstock

Emergence - the process by which new and coherent structures, patterns and properties 'emerge' from within complex systems

Traditional architecture starts from the premise that architectural structures are singular and fixed, and however well integrated are separate from their environment and context. Emergence requires that the opposite is true – that those structures are complex energy and material systems that have a lifespan, exist as part of an environment of other active systems, and develop in an evolutionary way.

This book, based on the authors' internationally renowned Emergent Technologies and Design course at the Architectural Association in London, introduces a new approach to the practice of architecture. The authors use essays and projects to demonstrate the interrelationship of concepts such as emergence and self-organisation with the latest technologies in design, manufacturing and construction.

With projects from their course, and critiques and commentary from some of the world's leading design theorists and practitioners, the authors of Emergent Technologies and Design have introduced a radical new way of understanding the way in which architecture is conceived, designed and produced.

From reader reviews:

Terry Tyrrell:

Information is provisions for anyone to get better life, information currently can get by anyone on everywhere. The information can be a information or any news even an issue. What people must be consider any time those information which is within the former life are challenging be find than now's taking seriously which one is appropriate to believe or which one often the resource are convinced. If you obtain the unstable resource then you get it as your main information we will see huge disadvantage for you. All those possibilities will not happen in you if you take Emergent Technologies and Design: Towards a Biological Paradigm for Architecture as your daily resource information.

Peggy Nunes:

Reading can called mind hangout, why? Because when you are reading a book specially book entitled Emergent Technologies and Design: Towards a Biological Paradigm for Architecture your head will drift away trough every dimension, wandering in every aspect that maybe unknown for but surely will end up your mind friends. Imaging each word written in a reserve then become one contact form conclusion and explanation this maybe you never get prior to. The Emergent Technologies and Design: Towards a Biological Paradigm for Architecture giving you one more experience more than blown away your head but also giving you useful facts for your better life in this era. So now let us show you the relaxing pattern the following is your body and mind is going to be pleased when you are finished examining it, like winning an activity. Do you want to try this extraordinary spending spare time activity?

Linda Bryant:

That publication can make you to feel relax. This book Emergent Technologies and Design: Towards a Biological Paradigm for Architecture was multi-colored and of course has pictures around. As we know that book Emergent Technologies and Design: Towards a Biological Paradigm for Architecture has many kinds or category. Start from kids until youngsters. For example Naruto or Detective Conan you can read and believe you are the character on there. Therefore , not at all of book are generally make you bored, any it makes you feel happy, fun and unwind. Try to choose the best book for you and try to like reading that.

Marylouise Potter:

Reading a reserve make you to get more knowledge from that. You can take knowledge and information from your book. Book is prepared or printed or outlined from each source this filled update of news. Within this modern era like today, many ways to get information are available for a person. From media social similar to newspaper, magazines, science book, encyclopedia, reference book, book and comic. You can add your understanding by that book. Ready to spend your spare time to open your book? Or just trying to find the Emergent Technologies and Design: Towards a Biological Paradigm for Architecture when you essential it?
