## **Empirico-Statistical Analysis of Narrative Material and its Applications to Historical Dating: Volume I: The Development of the Statistical Tools** A.T. Fomenko

Today the methods of applied statistics have penetrated very different fields of knowledge, including the investigation of texts of various origins. These "texts" may be considered as signal sequences of different kinds, long genetic codes, graphic representations (which may be coded and represented by a "text"), as well as actual narrative texts (for example, historical chronicles, originals, documents, etc.). One of the most important problems arising here is to recognize dependent text, i. e., texts which have a measure of "resemblance", arising from some kind of "common origin". For instance, in pattern-recognition problems, it is essential to identify from a large set of "patterns" a pattern that is "closest" to a given one; in studying long signal sequences, it is important to recognize "homogeneous subsequences" and the places of their junction. This includes, in particular, the well-known change-point problem, which is given considerable attention in mathematical statistics and the theory of stochastic processes. As applied to the study of narrative texts, the problem of recognizing dependent and independent texts (e. g., chronicles) leads to the problem of finding texts having a common source, i. e., the same original (such texts are naturally called dependent), or, on the contrary, having different sources (such texts are naturally called independent). Clearly, such problems are exceedingly complicated, and therefore the appearance of new empirico-statistical recognition methods which, along with the classical approaches, may prove useful in concrete studies (e. g., source determination) is welcome.

### **From reader reviews:**

#### **Tonia Jensen:**

Spent a free time and energy to be fun activity to accomplish! A lot of people spent their sparetime with their family, or their very own friends. Usually they accomplishing activity like watching television, going to beach, or picnic within the park. They actually doing same task every week. Do you feel it? Do you want to something different to fill your own free time/ holiday? Could possibly be reading a book might be option to fill your free time/ holiday. The first thing that you will ask may be what kinds of publication that you should read. If you want to test look for book, may be the e-book untitled Empirico-Statistical Analysis of Narrative Material and its Applications to Historical Dating: Volume I: The Development of the Statistical Tools can be good book to read. May be it may be best activity to you.

#### **Fay Harris:**

Your reading 6th sense will not betray anyone, why because this Empirico-Statistical Analysis of Narrative Material and its Applications to Historical Dating: Volume I: The Development of the Statistical Tools publication written by well-known writer who knows well how to make book that can be understand by anyone who also read the book. Written within good manner for you, still dripping wet every ideas and writing skill only for eliminate your own personal hunger then you still hesitation Empirico-Statistical Analysis of Narrative Material and its Applications to Historical Dating: Volume I: The Development of the Statistical Tools as good book not only by the cover but also by content. This is one reserve that can break don't assess book by its protect, so do you still needing a different sixth sense to pick this kind of!? Oh come on your examining sixth sense already told you so why you have to listening to another sixth sense.

#### **Bruno Reed:**

Many people spending their moment by playing outside with friends, fun activity together with family or just watching TV the entire day. You can have new activity to pay your whole day by reading a book. Ugh, you think reading a book will surely hard because you have to take the book everywhere? It all right you can have the e-book, delivering everywhere you want in your Smart phone. Like Empirico-Statistical Analysis of Narrative Material and its Applications to Historical Dating: Volume I: The Development of the Statistical Tools which is getting the e-book version. So , why not try out this book? Let's view.

#### **Robert Beaubien:**

With this era which is the greater person or who has ability in doing something more are more valuable than other. Do you want to become among it? It is just simple approach to have that. What you should do is just spending your time not very much but quite enough to experience a look at some books. One of many books in the top record in your reading list is definitely Empirico-Statistical Analysis of Narrative Material and its Applications to Historical Dating: Volume I: The Development of the Statistical Tools. This book which can be qualified as The Hungry Inclines can get you closer in becoming precious person. By looking up and

review this guide you can get many advantages.
