**The Sectional Anatomy Learning System (2-Volume Set Includes Concerts and Applications)** Edith Applegate MS

THE SECTIONAL ANATOMY LEARNING SYSTEM is thoroughly revised and updated with two new chapters including re-drawn illustrations, and new post-tests with images. The system consists of two volumes: a main text and a workbook of applications. A new chapter has been added on the vertebral column and spinal cord. The concepts section of the text now covers sectional anatomy of the entire body. It is organized to correspond to the text chapters. Applications consist of coloring and labeling exercises for over 250 revised drawings of transverse, sagittal, and coronal cadaver sections.
