**Basic Clinical Neuroscience (Point (Lippincott Williams & Wilkins))** Paul A. Young PhD, Paul H. Young, Daniel L. Tolbert PhD

**Basic Clinical Neuroscience** offers medical and other health professions students a clinically oriented description of human neuroanatomy and neurophysiology. This text provides the anatomic and pathophysiologic basis for understanding neurologic abnormalities through concise descriptions of functional systems with an emphasis on medically important structures and clinically important pathways. It emphasizes the localization of specific anatomic structures and pathways with neurological deficits, using anatomy enhancing 3-D illustrations.

**Basic Clinical Neuroscience** also includes boxed clinical information throughout the text, a key term glossary section, and review questions at the end of each chapter, making this book comprehensive enough to be an excellent Board Exam preparation resource in addition to a great professional training textbook.

The fully searchable text will be available online at thePoint.
