**Mind's Eye** Douglas E. Richards

**The breathtaking novel from the New York Times bestselling author called, "A worthy successor to Michael Crichton." (SF Book.com).**

Nick Hall can't remember who he is, but a number of people seem desperate to kill him. Soon Hall learns that advanced electronics have been implanted in his brain, allowing him to surf the web with his thoughts and read minds. But who inserted the implants? And why? And why has he been marked for death?

As Hall races to find answers, he comes to learn that far more is at stake than just his life. Because his actions can either catapult civilization to new heights--or bring about its total collapse.

Extrapolated from actual research on thought-controlled web surfing, Mind's Eye is a roller-coaster ride of a thriller that raises a number of intriguing, and sometimes chilling, possibilities about a future that is just around the corner.

Be sure to read the next Nick Hall thriller, BrainWeb, available now.

"Richards is a tremendous new talent" (Stephen Coonts) who can "keep you turning the pages all night long" (Douglas Preston)
