## **Worldwide Guide to Equivalent Irons and Steels (Asm Materials Data Series) Fran Cverna**

This volume covers standard designations from worldwide standards for cast irons and steel, wrought carbon and alloy steel, stainless steels, high-strength steels, and tool steels.

Entries are provided for more than 30,000 alloy designations. Well over 5,000 entries have been updated and more than 3,000 are brand new additions. In particular, the Fifth Edition features expanded coverage for specifications and designations from Japan, China, India, and South Korea.

The updated Fifth Edition covers more countries, more alloys, and more standards than previous edition, while keeping obsolete designations for those persons trying to duplicate equipment from old documents.
